Detailed Action

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 13 is rejected under 35 U.S.C. 102(b) as being anticipated by Satoh et al.

Satoh et al disclose (see fig.1) a recording medium including tracks (on disk,1) including a stream of code words, characterized in that the stream of code words comprises a first data block(see "data fields" shown DF on the "neighboring" tracks n through n+2, shown in figs.2(a)-2(c)).

Satoh et al further disclose (fig.2a-2c) "cross talk" values (see below) the value is based on a cross talk between the tracks, where the second track is adjacent to a third track which is adjacent to the first track. As shown in figures 2a-2c blocks, blocks 34B-38B represent the cross talk effects from other tracks (see below).

Satoh et al recite (col.4, Ins.24-44):

"FIGS. 2(a), 2(b) and 2(c) show neighboring three tracks (No. n), (No. n+1) and (No. n+2). The first track (No. n) has three sectors S(n, m), S(n, m+1) and S(n, m+2), the second track (No. n+1) has three sectors S(n+1, m), S(n+1, m+1) and S(n+1, m+2), and the third track (No. n+2) has three sectors S(n+2, m), S(n+2, m+1) and S(n+2, m+2). The square envelopes 30A, 31A, 32A, 33A, 34A, 35A, 36A, 37A and 38A represent reproduced signals from the sector ID part

Art Unit: 2819

(ID), and **the square envelopes 30B, 31B, 32B and 33B represent reproduced signals from the data field (DF)**. The square envelope 36B represents a reproduced signal of the sector $S(n+2, m)$ of the track (No. $n+2$) which is reproduced by crosstalk effect by which the laser beam for reproducing the sector $S(n+2, m)$ is affected by the sector $S(n+1, m)$. In a similar manner, the square envelopes 34B and 37B represent signals reproduced by the crosstalk effect of the sector $S(n, m+1)$, and square envelopes 35B and 38B represent signal S reproduced by the crosstalk effect of the sector $S(n, m+2)$."

3. Claims 1-12 are allowed.
4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Van Den Enden et al, Kuribayashi et al, Kanaoka et al disclose methods for reducing crosstalk in recording mediums.
5. The examiner may be reached at 572-272-1816 Mon-Fri from 8-4:30.
